

◆ SPANNING CONCEPTS

Spec-Driven Development

The spec is the source of truth

Bounded Contexts

Isolated, AI-readable modules

AI Hygiene

Small, cohesive, ~100-line files

Context Entropy

Sizing 1–13, not story points

Human-in-Loop Gates

Gate the irreversible

Self-Healing Loop

Telemetry → spec amendment

Risks & Governance

Security, privacy, accountability

Every fix re-enters at **Spec** — never the code. Two gates never relax: **reconcile the spec** & a **human gate on irreversibles**.

THE DIGITAL ORG CHART — AI PERSONAS YOU CONDUCT

The Visualizer

GENERATIVE UI

Product intent → clean, semantic component code.

The Engineer

CORE IDE ENGINE

Repo-aware code generation straight from the spec.

The Guardian

AUTONOMOUS QA

Adversarial testing in a fresh context — breaks the build.

THE FOUR PILLARS

Architect-Engineer Collapse

Vision + execution in one mind.

01

Single-Shot Vertical Slice

Schema→API→state→UI in one cycle.

02

Spec-Driven Development

The spec is the source of truth.

03

High-Context Modular Design

Isolated, AI-readable contexts.
